

Obstetric and gynaecological violence in the EU - Publications Office of the EU

 Publications Office of the European Union

20th Jun 2024

This study presents an overview of how the issue of obstetric and gynaecological violence is currently being apprehended in the EU. Based on research carried out across the EU 27 Member States, it identifies issues and challenges; looks at the legal framework currently applicable to this form of violence; examines ongoing political and legal developments; and gathers initiatives carried out at ...

Innovative tools for the direct assessment of social and emotional skills

 OECD

3rd Jun 2024

Social and emotional skills (SES) are important for various life outcomes, such as academic achievement, mental health, job performance or civic engagement. The assessment of these skills in children and adolescents, however, currently relies heavily on the use of self-reported questionnaires. As such, there is an urgent need for more direct measurement approaches of SES, which look at behaviou...

Written evidence from the Poverty Alliance SVC0066

about us

The Poverty Alliance is Scotland's anti-poverty network. Together with our members, we influence policy and practice, support communities to challenge poverty, generate evidence through research and build public support for the solutions to tackle poverty. Our members include grassroots community groups, academics, large national NGOs, voluntary organisations, statutory organisations, trade unions, and faith groups.

The Poverty Alliance welcomes the opportunity to respond to this consultation on supporting vulnerable claimants. We recognise the critical role that the Department of Work and Pensions must play in the service delivery experience and safeguarding of households that are termed 'at risk'.

Recognizing the underlying drivers and intersections of poverty is critical when considering the context of vulnerability and the operationalisation of supporting households. Understanding and ensuring adequacy of support and robust structures for households access to DWP services is critical in terms of the upholding the dignity, safety and rights of all claimants.

In this response Poverty Alliance call for the increased importance and recognition of 'Vulnerable Claimants' engaging with DWP administered services. We highlight the importance of the conceptualisation and operationalisation of vulnerable claimants, experiences of different claimants, as well as recommendations on the Six Point plan.

1. DWP does not have a statutory duty to safeguard the well-being of vulnerable claimants. Should this change? If so, what should the duty look like?

The DWP has stated in the past that it does not have a statutory duty to safeguard the well-being of vulnerable claimants. We strongly disagree. Like other public bodies - local authorities, the NHS, the police service, etc - the DWP has a duty of care towards those using its services. We outline below why this is the case.

Importance of Vulnerable Claimants

The Department of Work and Pensions has a critical role to play in providing support across its services to ensure that service users are adequately protected and supported. This needs to include all areas of statutory responsibility including the Child Maintenance Service (CMS) and administration of social security benefits.

As one of the largest public services in the UK, the DWP is responsible for social security, pensions, and child maintenance policy. DWP spends around £212 billion in payments each year with a staff team of over 90,000 employees.¹ The scale and

The 'Welcomed Lockdown' Hypothesis: When Do Mobility Restrictions Influence Mental Wellbeing?

 Ifo Institute

15th Jun 2022

The COVID-19 pandemic and its mobility restrictions have been an external shock, influencing wellbeing. However, does risk exposure affect the welfare effect of lockdowns? This paper examines the 'welcomed lockdown' hypothesis, namely the extent to which there is a level of risk where mobility restrictions are not a hindrance to wellbeing. We exploit the differential timing of the effect of the...

This report provides evidence-based insights and recommendations on how public communicators can strengthen the future of democracies by navigating (new) information ecosystems in ways that earn the trust and confidence of citizens. At a time when trust in government is increasingly recognised as important to democracy, the report aims to support institutions in tackling the societal challenges...

Urban adaptation in Europe : how cities and towns respond to climate change.

 Publications Office of the European Union

1st Dec 2020

In 2020, the urgent need to improve the resilience of European society and economy to shocks of unprecedented scale became obvious in the light of the coronavirus disease 2019 (COVID-19) pandemic. The public health crisis showed that — despite plenty of early warnings — Europe is unprepared and extremely vulnerable to events of such magnitude. Under the projected trajectory of climate change, t...

Actualmente, se carece de información clara sobre la incidencia de malformaciones fetales y los tipos específicos en el Perú. Sin embargo, estadísticas del Ministerio de Salud (Minsa) dan cuenta de que la mortalidad por causas relacionadas a malformaciones —así como a prematuridad— ha ido en incremento. Según los registros del Minsa, en el año 2011, el ...

New South Wales community perceptions of coastal erosion and inundation

 Analysis & Policy Observatory

7th Jun 2019

Various locations along the coast of New South Wales (NSW) are presently subject to amenity loss and infrastructure damage associated with erosion and inundation resulting from severe coastal storms. The continued occurrence of these storm events, as well as anticipated sea level rise, will only enhance the extent and cost of erosion and inundation damage of coastal zones throughout NSW in the ...

Meat Analogues: Considerations for the EU

 Chatham House

19th Feb 2019

Plant-based 'meat' and 'lab-grown' meat may help to tackle the unsustainability of the livestock sector. Focusing on the EU, this paper explores the challenges of scaling up production and generating demand for such meat analogues.

Psychological therapies for chronic post-traumatic stress disorder (PTSD) in adults

 Guidelines in PubMed Central

13th Dec 2013

Abstract Background Post-traumatic stress disorder (PTSD) is a distressing condition, which is often treated with psychological therapies. Earlier versions of this review, and other meta-analyses, have found these to be effective, with trauma-focused treatments being more effective than non-trauma-focused treatments. This is an update of a Cochrane review first published in 2005 and updated in ...

Promoção do bem-estar na adolescência: Impacto do estatuto socio-económico e do estatuto migrante

TÂNIA GASPAR (*)

INTRODUÇÃO

Os maiores interesses de investigação científica e psicológica concernem à saúde mental dos jovens, particularmente o modo como a saúde mental se relaciona com o estatuto socio-económico e o estatuto migrante. Este artigo pretende dar uma contribuição ao debate incluindo considerações teóricas (abordagem genérica), caso, dados, etc. 1. Primeiro, consideramos a saúde mental de cada sexo, em função do estatuto migrante (brasileiro, europeu, negro, asiático, latino-americano) (GASPAR, 1999).

2. Em seguida, analisamos os efeitos do estatuto socio-económico e da migração sobre a saúde mental, considerando dois diferentes estatutos socio-económicos e migratórios, isto é, os que se inseriram no país antes da migração e os que se inseriram no país depois da migração. Analisamos também a influência da escolaridade na promoção da saúde e do estatuto socio-económico, assim como o estatuto migrante e o estatuto socio-económico na promoção da saúde mental de cada sexo. Os resultados são discutidos à luz da literatura sobre o tema.

Palavras-chave: Estatuto Migrante, Estatuto Socio-Económico, Saúde Mental, Jovens, Estatuto Migrante, Estatuto Socio-Económico.

Introdução e comentários que permitam compreender os comportamentos relacionados com a saúde mental de diferentes culturas e valores, assim como os efeitos do estatuto socio-económico e do estatuto migrante na saúde mental e no bem-estar dos jovens. Este artigo pretende dar uma contribuição ao debate incluindo considerações teóricas (abordagem genérica), caso, dados, etc. 1. Primeiro, consideramos a saúde mental de cada sexo, em função do estatuto migrante (brasileiro, europeu, negro, asiático, latino-americano) (GASPAR, 1999).
